

RECLAIM
ENERGY

It's time for massive savings off your energy bill

With our CO2 heat pump hot water system you will use less energy than an electric water heater for a higher thermal output

MANAGING
YOUR ENERGY
EFFICIENCY
SIMPLY

Smart hot water is now a reality.

DOLLARS AND SENSE .

- . Average annual energy saving of up to 80%
- . Average running cost of \$360 per annum*
- . Average daily consumption of 3 kWh per day
- . Estimated payback period of 3 years
- . Warranty up to 15 years**

* Energy usage varies based on individual household requirements and location. Estimates provided here are based on the results of field trials undertaken in Australia across 2018. ** Our Stainless Steel Tanks come with a 15 year warranty.

PERFECT HOUSE GUEST .

- . The quietest system on the market (Average noise level: 37 dB) whisper quiet functionality
- . 315L tank size (Glass Lined Enamel or Stainless Steel - there are benefits to both depending on where you live and your water supply)
- . Ozone friendly CO2 refrigerant
- . Built-in frost control operation
- . Built in legionella control operation
- . Smart top down heating mechanism (faster hot water access and recovery)
- . User friendly controls puts power back in your hands!

SMART FEATURES .

- . PV setting allows customers to maximise the energy they produce to offset their hot water energy costs. (making the most of when the sun is shining)
- . Single shot boost (providing you with additional hot water quickly and as needed)
- . Off peak (ensuring your energy use coincides with off peak energy rates)
- . Continuous hot water (simply set and forget to enjoy continuous energy efficient low cost hot water)
